

FAMILY *Tech Talk* NIGHT

Inspiring Digital Responsibility

Goals for the Presentation

- To help you understand how your children are using the Internet and personal technology (trends, apps, websites, etc.)
- To understand your role in teaching kids to be successful and mindful of safety, privacy, and balance between online and offline time
- To start a conversation about Internet safety with friends, family, neighbors, and teachers

What Do Kids Do Online?

- Apps
- Websites
- other?

Quiz! Some facts about kids' online life

- What percentage of 4 year olds use a mobile device?
- What percentage of 4 year olds own their own mobile device?
- By the time their teens how many kids experience some sort of cyber bullying
- What percentage of parents help their children set-up the privacy settings on social networking sites and apps?
- What percentage of teenagers say they know how to hide what they do online from their parents?

Source: Pediatrics, October 2015: Exposure and Use of Mobile Media Devices by Young Children

Risks Associated with Kids' Internet Use

- Too much screen time
- Exposure to age-inappropriate/adult content
- Unwanted marketing
- Unwanted interactions

The Benefits of the Internet for Kids

- To learn
- To play
- To not fight with their siblings or give parents a moment of peace!

What Does It Mean To Be a Good Digital Citizen?

- Having fun, learning, and making social connections in a safe and balanced way
- Understanding and respecting safety, ethics, and privacy
- Maintaining balance with online and real-life activities
- Being kind online—including to yourself!

Balance Time Spent Online

- Teach kids to use the Internet but to limit their “just because” or mindless online time
- Teach them to respect others’ offline time, as well, by not repeatedly asking friends to engage online if they’re busy doing other things

Getting Into Some Other Specifics

- Social media
- Cyberbullying
- Safety
- Privacy
- Digital footprint

Social Media/Networking

- 76% of teens (81% of older teens) use a social network
- Their sites of choice include Facebook, Twitter, Tumblr, Vine, Instagram, and Snapchat.
- Younger kids like Minecraft, YouTube for Kids, Vine Kids
- The sites and apps being used change quickly

Potential Risks of Social Media

- Can be a big “time suck” and distraction from homework and other responsibilities
- Can foster tweens/teens’ natural impulsivity and failure to consider consequences
- Can encourage predators and scammers
- Can lead to an unflattering digital footprint that may follow kids through college
- Can distract from overall balance and lead kids to be unkind

Be Kind on Social Media

- Remind your child not to post messages or photos that criticize or make fun of others
- Stress the message that “likes” are not an indicator of someone’s worth or likeability. A “like” is just the click of a button
- Let your child see you modeling kind online behaviors, to others and yourself

Cyberbullying

- Using online technology to repeatedly act cruelly to someone
- Posting or forwarding a private text or embarrassing image to others
- Tricking someone into revealing embarrassing information and forwarding it
- Spreading rumors

Dealing With Cyberbullying

Along with monitoring your child's social media, tell him to:

- Resist responding to unkind remarks
- Block the cyberbully
- Tell a trusted adult
- Save the posts and notify law enforcement or the school, if appropriate
- Consider deactivating his account if it continues to affect him negatively

Some Nuts and Bolts on Safety

- Put strong passwords on devices and change them often
- Install Internet filters and parental control apps if needed
- Keep your security software up to date
- Make sure phones are charged outside of kids' bedrooms at night
- Set up nighttime shut-off through cell service provider

Other Safety Tips

- Be familiar with the sites your child visits and the games he plays
- Know his online “friends”
- Keep an ongoing dialogue about the ways he’s using digital technology and its effects
- Post information about and photos of your kids wisely
- Watch for “ghost apps”—if you notice your child has an app open repeatedly and it’s something innocuous (like a calculator), ask him—it could be hiding something else

Safeguard Against Scams

- Don't click on unfamiliar links
- Don't open or reply to emails from unknown senders
- Avoid videos that require you to download video player software
- Don't enter online contests or giveaways
- Keep your security software up to date

Protecting Against Predators

- Tell your kids not to accept friend requests from people they don't know in real life
- Tell them to ignore comments and messages that make them uncomfortable or are posted by people they don't know
- Tell them to let you know if someone is bothering them or making them feel uncomfortable online
- Contact authorities if you feel it could be a predator

A Note About Privacy Settings

- Be aware of privacy settings and what your profile looks like to the public
- Keep your profiles private and only connect with people you know in real life
- Understand how sites might use personal information
- Know how to turn off geotagging

Helping Kids Manage Their Digital Footprint

- Everything I do reflects on me.
- Anything I post is there forever.
- Information I post can easily be copied.
- Things I post can quickly be sent to many.
- You're never sure who can see what you're posting, clicking on, downloading.
- It's not clear whether you're just sharing with a few.
- People behave differently when they can't see you.

(danah boyd, Taken Out of Context, 2008)

A Digital Code of Conduct

- Be online.
- Protect your personal information.
- Treat others online as you would treat them in person.
- Be kind to yourself.
- Be aware of balancing your real and online lives, and be respectful of others' balance.
- Stand up for others—don't tolerate cyberbullying.
- Avoid plagiarism and copyright infringement.
- Create secure passwords and keep them secret from your friends.
- Delete (and don't open) suspicious emails.
- Ignore contact from strangers online.
- Tell your parents if something you read online makes you uncomfortable.
- Check with your parent or other trusted adult before downloading any content.

Key Takeaways

Remember, Online Life Is a Part of Life for Just About Everyone

- The Internet and digital technology enable kids to learn and communicate in a variety of helpful and interesting ways
- Parents can help make digital technology a positive experience for kids by helping their child find positive ways to use technology and be online

Key Takeaways

Balance Online Life and Real Life

“If we always have our phones in our faces, we will never know what’s in front of us.”

- Erik Hartman, 15

Key Takeaways

Your Part in Their Experience

- Decide the basics
- Set the rules
- Teach them to be good digital citizens
- Model good digital/online behavior
- Let them try
- Keep the conversation going

Your Next Step:

Keep the Conversation Going

- Ask your child's teacher whether she talks to the class about being a good digital citizen
- Talk to your child's friends' parents about keeping a collective eye on (and communicating about) your kids' Internet activities
- Remind your kids about letting an adult know if they witness unkind behavior
- Educate other adults in your child's life (relatives, activity leaders, etc.) about these topics
